INDIANS BELLIGERENT.

Their Grievance Against a Land

Company in Nebraska.

A SERIOUS UPRISING IMMINENT.

The Land Company Appeals to the Courts to Restrain Captain Beck, Agent of the Winnebago Indians, from Electing Settlers from the Reservation.

OMARA, April 23.—Two hundred and ten Thurston county settlers have been summoned to appear in the federal court at Omaha in the case wherein the Flourney Land company asks a permanent injunction restraining Captain Beck, agent of the Winnebago Indians, from ejecting the settler on the reservation who have subleased the Indian lands from that company. The case has been a feature of disturbance on the reservation for months. United States District Attorney Sawyer who has charge of the case for the govern ment, asserts that there is danger of serious trouble from the Indians. He is inclined to think an outbreak may occur at

Captain Beck said the Indians had good cause for grievance. Even the money collected for Indian children had not been paid. It was a clear violation of guardtanship confidence, and when an Indian's child is wronged it generally found resentment in the hearts of the tribe. The Indians, he said, were now developing a keen interest in the case. They have lately established a relay of couriers, and as soon as information is obtained it is transmitted quickly, and in a few hours all the Indians are posted on current

When asked why the two Indian police now in jail were not released on bail Captain Beck said he wanted them to remain in jail in order to einch a suit for false imprisonment which he will bring against Sheriff Mullin and others. As an example of the temper of his redskin charges the captain said one chief volunteered a hundred men to prevent the arrest of the two Indian police.

The following imperial proclamation has been issued:

"Through peace national prosperity is best promoted. Unfortunately the rup ture of relations with China forced upon us a war which, after the lapse of ten months, is not yet ended. During this period our ministers in concert with the army, navy and diet, have done all in their power to further our aims in obedience to our subjects. Our ardent desire, with the assistance of our subjects, in loyalty and sincerity, is to restore peace, and our object the promotion of national prosperity. Now that peace is negotiated and an armistice proclaimed a permanent cessation of hostilities is near at hand. The terms of peace fixed by our ministers of state give us complete satisfaction.

"The peace and glory thus secured render the present a fitting time to declare to you, our good subjects, the object kept in our view, and to enlighten you as to the course of our future policy.

"We are rejoiced at the recent votories which have enhanced the glory of our empire. At the same time we are aware that the end of the road which must be traversed by the empire in the march of civilization is still far distant and remains yer to be attained. We therefore hope, in common with our loyal subjects, that we shall always guard against self contentedness, be ever in a spirit of modesty and humility, and strive to perfect our military defense without falling into extremes. In short, it is our wish that the government and the people alike shall work to a common end, and that our subjects of all classes strive each in his sphere for the purpose of laving the foundation of permanent prosperity.

"It is hereby definitely made known that no countenance will be given by us to such as, through concelt at the recent victories, may offer insults to other states and injure our relations with friendly powers, especially as regards China. After the exchange of the ratifications of the treaty of peace friendship should-be restored and endeavors made to increase more than ever before the relations of good neighbor-

LONDON, April 23.-In an editorial this morning The Times, after admitting that Japan evidently intends to cripple and humiliate China in a manner seriously affeeting European interests, insists that the diplomatic history of Europe dues not bear out the pretension that any power or powers are entitled to dictate the terms of peace between the two nations. It adds: "Great Britain's interests are involved quite as much as Russia's, but we find no stipulations in the treaty of peace warranting our interference at the cost of exciting the camity of Japan."

A dispatch to The Times from Kobe Japan, says that all the furloughs of the officers of the Russian men-of war at that place and Nagaski have been stopped. The commanders of the warships have received an order from the Russian legation to hold themselves in readiness to leave at twelve hours' notice.

her own trade without earning Chinese

THE ALABAMA LINCHING

The Atrocious Murder That Led to the Quintuple Crime.

THE VICTIM'S BODY INCINERATED.

Women Built a Fire and Kept It Burning Until All Had Been Consumed but the Heart and Liver, Which Were Taken Away and Buried.

GREENVILLE, Ala . April 23 -- Regarding the murder of Watts Murphy, which occurred a few days ago near h shome, about fourteen miles west of this place, and which was the prelude to the quint role lynching late Saturday night or early Sunday morning, already reported the facts are meager. Sheriff Bargainer and G W Hinson left for the scone of the crime as soon as they received the news that the remains of the murdered man had been dis overed. The suspected parties, four men and two women, all negroes, had been arrested in the meantime by the neighbors of the murdered man. The men on being questioned acknowledged the crime and gave a detailed account of the horrible butchery, which is revolting in the extreme.

The parties were all in the field together when a dispute arose, ending by one of the negro men striking Murphy on the head with a limb of a tree. The other men then jumped on him and beat him into insensibil by, after which they carried his body to a log hut. The women hastily gathered brush and sticks, piled them upon the body and fired the heap. One of the women says that their victim turned over after the hair had been burned off his head. Wood was added to the pile until everything was consumed but the heart and liver. They refused to burn, and

were taken away and buried. The first clew as to the whereabouts of the missing man was obtained by the finding of the teeth and a few bones, which resulted in the arrest and confession. The murderers were: Cal Johnson Fred Douglas, Jim Calhoun, Sim Jernigan, Mary Davis and a woman called "Jenny." Sim Jernigan, it is said, was the one with whom the quarrel began and who struck the blow which felled Mr. Murpay, and is the negro who escaped after being taken into custody.

Sheriff Bargainer and Mr. Hinson went to the Buckalew place, where they were told the prisoners were being held. On arrival, however, neither the negroes nor their captors were to be found. A search was made of the surrounding woods, and in a short time the three-men were found hanging from one tree and the women from another near by. The sheriff began an investigation, but was unable to get any facts as to who composed the mob.

They wounded four deputy sheriffs and so terrorized the people that they locked themselves in their houses to save their lives. A telegram was sent to Wasl:ington, this state, sixteen miles away for aid, and a company of troops was put at the disposal of the sheriff. Sunday morning the people of Bath started out to arrest the leading rioters. They captured five. One named Lanier resisted and fired at the posse and was shot twice and mortally wounded. Too Slow

in making clothes, this was. It had to go. And yet people thought it a pretty good thing in its day. Some of them couldn't believe, all at once, that there was anything better. Just so with every improvement. The old way always has some benighted ones who cling to it to the last.

Too Fast

in ruining clothes, un-making them — that's the trouble with the washboard. But it's going now and going fast, to join the spinning-wheel. Women find it doesn't pay to rub their clothes to pieces over it. They can wash better with Pearline. Less work, less wear, no ruinous rub, rub, rub. That's the modern way of wash-

ing-safe, easy, quick, cheap. No wonder that many women have thrown away the washboard.

Send Peddlers and some unscrupulous grocers will tell you "this is as good as" or "the same as Pearline." IT'S FALSE—Pearline is never peddled, and if your grocer sends you something in place of Pearline, be honest—send it back.

A runaway steamer must be an exceedingly unpleasant sort of sea serpent for the passengers on board her. The steamer Marchioness of Breadalbane, while making the passage from Rothesay to Gourock, met with an accident to her machinery, and the engineers were unable to stop her. The captain therefore took her out into midehannel and spun round in a circle till the steam was nearly exhausted, when the runaway was headed for Gourock, where she was secured by ropes and the rest of the steam run off. -London Graphic.

"Home, Sweet Home."

"Home, Sweet Home," Payne's song, was originally a number in the opera "Clari, the Maid of Milan," a production brought out in 1823. The opera was a failure, and nothing is now known of it save the one song, which became instantly popular. Over 100,000 copies were sold in the first year of its publication, and the sale in one form or another has been constant ever since the first appearance of this beautiful theme. The melody is a Sicilian folk song and was adapted to the words by Payne himself. -St. Louis Globe-Democrat.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Curs is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature to do its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it falls to cure. Send for list of Testimonials. Address,

MACEO, THE CUBAN PATRIOT.

Fighting For Freedom Under the Five Barred Flag With the Single Star.

There are probably more major generals, brigadiers, colonels and captains in the Cuban revolutionary army than in all Kentucky. Some of them are veterans, and others are getting their first taste of grim visaged war. In the former class is Major General Antonio Maceo, who stands next to General Maximo Gomez in the affections and admiration of the patriots who are battling for liberty in Cuba as the boys of '76 battled at Lexington, Monmonth and Ticonderoga.

General Maceo participated in the ten years' war and was a leader in the ranks of the revolutionists. He was severely wounded at one time and was hunted for days by the Spanish troops He eluded them in the monntains and finally escaped in a small boat. After days of terrible suffering from hunger and thirst beneath a tropical sun be

MAJOR GENERAL ANTONIO MACEO. reached a friendly port. He is described as a handsome mulatto who is very neat

in his dress and courteous in manner. Maceo has marked talent as a leader for liberty and is greatly feared by the Spaniards. He and a party of trusted retainers left Costa Rica for Cuba March 28 in the steamer Adirondack. The captain refused to land them where they desired, and it is said the passengers killed the captain, ran the vessel ashore near Baracoa and joined the insurgents.

Since Maceo has landed on Cuban soil another great general, Martinez de Campos, has sailed for the island. He is the man Spain expects will crush the patriots with an iron hand. He has been premier of Spain and is generally considered her greatest living general. He has crushed Cuban revolutions before and will be a formidable foe, backed as he is by many thousands of Spanish troops.

GEORGE H. THOMPSON, EDITORS - CITY EDITOR J. F. ROBINSON, A. F. NICKINSON. - BUSINESS MANAGER

TUESDAY, APRIL 23, 1895.

Gov Evans, of South Carolina, declared, yesterday, that he would treat with contempt the order of the him from ordering an election of delegates to the constitutional c nvention. The Governor says that S uth Jarolina is -overeign and independent and that his duty is to obey its laws not the mandates of a federal judge.

The announcement of Sepator Blackburn that he stands as a candidate for re-election on a free silver platform is most significant. Mr. Blackturn is an old and experienced politician and realizes that his re-election will be sharply contested by other aspirants for Senatorial honors and when he avows himself for free silver it is undoubtedly because he believes that by this action he places himself at the head of the most p werful and distinctly formulated political force in Kentucky.

WILD COLUMNIK MIDERS.

Two Americans Saw Them Break a Winter Camp In Tuckestan.

Messrs. Allen and Sachtleben, who went around the world on bicycles, give the following account of one of their experiences in Turkestan:

One of the chief incidents of our pleasant sojourn was afforded by Governor Ivanoff. We were invited to head the procession of the Cossacks on their annual departure for their summer encampment in the mountains. After the usual religious ceremony they filed out from the city parame ground. Being unavoidably detained for a few moments, we did not come up until some time after the column had started. As we dashed by to the front with the American and Russian flags fluttering side by side from the handle bars, cheer after cheer arose from the ranks, and even the governor and his party doffed their caps in acknowledgment.

At the camp we were favored with a special exhibition of horsemanship. By a single twist of the reins the steeds would fall to the ground, and their riders crouch down behind them as a bulwark in battle. Then, dashing forward at full speed, they would spring to the ground and leap back again into the saddle, or hanging by their legs would reach over and pick up a handkerchief, cap or a soldier supposed to be wounded. All these movements we photographed with our camera.

Of the endurance of these Cossacks and their Kirghiz horses we had a practical test. Overtaking a Cossack courier in the early part of a day's journey, he became so interested in the velocipede, as the Russians call the bicycle, that he determined to see as much of it as possible. He staid with us the whole day, over a distance of 55 miles. His chief compensation was in witnessing the surprise of the natives, to whom he would shout across the fields to come and see the tomasha, adding in explanation that we were the American gentlemen who had ridden all the way from America. Our speed was not slow, and frequently the poor fellow would have to resort to the whip or shout: "Slowly, gentlemen. My horse is tired. The town is not far away. It is not necessar

ry to harry so. The fact is that in all our experience we found no horse of even the famed Kirghiz or Turcoman breed that could travel with the same ease and rapidity as ourselves even over the most ordinary road. —Century.

THE COMMON COUNCIL

PROCEEDINGS OF AN ADJOURNED

A Bill for Damages-A Back Down in the Canal Street Matter - Wants a Churck Steeple Torn Bown-Claims Exemption From Taxation-Interesting Discussion About the City En. gineer and His Duties-Curbing, Paving Crosswalks and Other Work Ordered-Bills Audited.

As adjourned regular meeting of the Common Council was held, last evening, all the members being present except Mr. Mance.

Herbert Gedney, Esq., addressed the Council in behalf of S. D. Horton, who has had a bill against the city ever since the Wickham avenue sewer was built several years ago. The bill amounts to \$230, of which \$150 is for cost of rebuilding drains destroyed, \$30 for cistern destroyed and \$50 for loss of use of lands. The matter was referred to the Street

A request that Prospect avenue from East Main to DeWitt street be accepted by the city was referred to the Street Committee.

MR. FELLOWS' GRIE VANCE Mr. O. S. Fellows said he had a grievance—the changing of the name of Canal street between West Main and Fulton streets. He said a remonstrance had been signed which represented \$81,305 of the assessed valuation on the block. This was presented to the Council and was not read when the change of name was made. He read the remonstrance and asked that the Council rescind its action.

Mr. H. W. Corey said fifty land owners—all but ten upon the streehad signed the remonstrance against the rescinding of the resolution changing the name from Canal street to Wawayanda avenue, which he presented. He objected to changing the name of a portion of the etreet. He quoted two of the signers of the original remonstrance presented by Mr. Fellows as saying they were willing that the name Wawayarda avenue shall stand. The signers of the remonstrance against resscinding the action of the Council would contest their rights.

A petition to grade and curb Genung street from South street to Academy avenue was referred to the Street Committee.

AFRAID OF GRACE CHURCH SPIRE. A communication from B. F. Low, Esq, stated that the spire of Grace Church is unsafe and dangerous to life and property, and asked that it be removed, and if the city fails to do so and it should fall and should damage the Low building, the city will be held responsible. Referred to the Building Committee.

A communication from Amzi Turner stated that his property, No. 48 Sprague avenue, was purchased with pension money and was, therefore, not liable to taxation of any kind, was referred to the City Attorney.

A communication from the Clerk of the Board of Health, called attention to the need of a public dumping ground. It was referred to a special committee composed of Messrs. Reed, Hirst and Bastian.

POLICE SUPPLIES WANTED.

A request of the Captain of Police for nine hats, nine wreaths, three airs of hardsuffs and an officer's shield was referred to the Police Committee, to report at the next meeting. A resolution of Mr. Bowler that

Harding street be graded and curbed, from Hanford street to the Erie road, was referred to the Street Committee.

Mr. Hirst called attention to the condition of Waalkill Engine house. A leak from the gutter has wasted the mortar from the bricks and caused the plaster to fall from the wails. Referred to the Building Committee

W.C. Many asked that the ditch be opened under the Lake avenue, Monhagen avenue and West Main street bridges. The Street Superintendent was directed to do the work. WAWAYANDA AVENUE AGAIN CANAL ST.

Mr. Reed moved to reconsider the resolution adopted at the last meeting, changing the name of Canal street to Wawayanda avenue.

Mr. Bastian seconded it, saying that action had been taken too hastily. Mr. Hirst said he could not see how the Council could rescind its action and quoted clause 30 of section 9 of title 3 of the city charter, which provides that Council can only give names to streets and numbers to lots, and change the names of streets on petition of a majority of the land owners on same.

He said the name of the street had been changed according to the provisions of the charter. The action of Council had not been invalidated by a veto by the Mayor and the name could not be changed again except upon a petition of the majority of the land owners.

Mr. Reed said Roberts, rules of order govern the deliberations of the Council and this authority said all proceedings could be rescinded at the next r gular meeting.

City Attorney Wiggins was appealed to. He said he couldn't see why the resolution could not be reconeidered and a vote was taken, all voting yes except Mr. Hirst, and Roberts' rules of order were practically declared a better authority than the city charter.

Mr. Reed then moved that the 1 | original petition to change the name | \$7,500.

of Canal street to Wawayanda aveuue be referred to a special committee to report at the next meeting.

Crosswalks were ordered on Little avenue at the north eide of Sprague; on Sprague avenue north side of Fulton street; on West Main street,

west side of Monhagen avenue. MUST THE CITY PAY FOR MAPS?

Mr. Reed precipitated an interesting discussion by stating that the Assessors wanted maps and the City Eagineer would furnish blue prints of maps now in his possession, but must be paid for maps of properties which he would be required to make. Mr. Reed thought he should be paid and moved that the "Assessors be empowered to employ the City Engineer to make maps.

Mr. Bowler said he thought it had been decided that it was a part of the Engineer's duties to make maps. Mr. Reed-'Not when maps are

wanted on streets not accepted." The Clerk said he had given the resolution calling for the maps to the Engineer, who said he would furnish them, but said nothing about extra compensation.

An attempt to get an expression from the Attorney as to the Engineer's duties fail d.

WHAT ARE THE ENGINEER'S DUTIES ? Mr. Bastian said he wanted to know what the engineer's duties were. Somebody ventured the very indefinite information that it was "to comply with the recommandation of the Council."

Mr. Reed made a new motion that the city engineer be paid for making maps.

Mr. Sinsabaugh-"How much does he charge?''

Mr. Hirst-"I think it is the englneer's duty to do the surveying and making of maps needed by the city." Mr. Bowler-"I don't see what we

Mr. Hirst from a special committee on the matter of D. R. Miller's claim to the old road on North street and for stone furnished as an offset to his assessment on account of North street, reported a settlement of the matter by Mr. Miller giving his note for \$300 with interest at six per cent. and the giving of the city of a quit claim deed to the old road. Ira M. Corwin 30 25

At a meeting of the property owners on Canal street, who had agreed to widen the street from thirty-three to fifty feet, it was decided to discon tinue work and withdraw their assents if the Council persists in changing back the name of the street from Wawayanda avenue to Canal street. Already 500 feet of the street has been graded and widened. The action of the Council in blocking this improvement on account of one man's whims is to be regretted.

RESIDENT JANITORS. | "For Charity Suffereth Long."

THOSE WHO CARE FOR OFFICE BUILD-INGS THE CREAM OF JANITORDOM.

Not So High Socially as Superintendents, but Still Men of Some Importance. Their Homes at the Tops of Great Structures of Steel and Stone.

The resident janitor is essentially a tity type.

Under one title or another he has existed ever since the first modern city was built. In Paris, as the concierge, he has flourished for centuries. He has been much more in evidence than ever before in American cities since the adoption of the steel truss by builders and the introduction of the rapidly moving passenger elevator, because these two in-

ventions have made possible the erection of the great office buildings that form today such a notable feature of these great settlements.

In many ways the life of a resident janitor and his family is different from the life of any other class of persons. Instead of dwelling in a house by themselves or in a flat with many other tenants in the same building, these live in apartments at the top of a vast structure of brick and stone and steel that is full of life and action and companionship in the daytime, but at night deserted and silent as the grave. Even in the day the companionship of the hundreds or thousands that inhabit the big building during business hours is not for the members of the janitor's family. So far as the tenants are concerned, these might as well not exist at all. Although they are physically removed from them only by the height of a few stories, they are virtually as remote as if leagues of sea and walls of mountains separated them. Between the janitor's family and the tenants, in fact, there exists that most impassable of barriers, difference in social standing, a barrier that many would have us believe is not as apparent here as elsewhere, but which is quite as insurmountable here, when it exists, as anywhere else in the world.

Even the smart typewriter girls and the junior clerks in the offices look down upon the janitor's wife, his sons and his daughters whenever they chance to see them, while to the janitor himself only that sort of toleration is accorded that is meted out to a servant of an upper grade. When the building is a very big one, however, the janitor becomes a uperintendent, and with the change of title there is a vast change in the social standing of the man in charge and that of his family, though his duties would not seem likely to undergo any great change. But there is this really important difference—the janitor is obliged himself to perform a part of the menial services that must be rendered about the building, while the superintendent, who is generally also the renting agent, is able to delegate all these things to employees of a lessor grade, to spend his own time in an office coite as well fit-ted up as that of any tenant and to live "up town" or in the suburbs.

Of course the superintendent generally receives better pay than the janitor and for that reason is usually of a higher grade intellectually, for money will always procure brains. Janitors get from \$75 to \$200 a month, though the latter figure is not often reached. Superintendents receive from \$2,000 to \$5,000 a year and occasionally more even than the latter figure. The author-

ity of the superintendent extends over the entire building from the stokehole in the second subcellar to the tip of the flagstaff. His subordinates include the engineer and the elevator men, as well as the scrubbers and cleaners and the watchmen, and in some cases there is a janitor as well as a superintendent. In buildings without superintendents, however, the administration is two headed, the engineer having charge of the heating, the engine and the elevators, while the janiter has the eare only of the comfort of the tenants and the cleaning and care of the rooms and corridors.

Yet, notwithstanding his circumscribed domination as compared with that of the superintendent, the janitor of a big office building is a good deal of

a man in his way, for even in an office building of moderate size, as such structures go nowadays, he has quite an army of employees under him. The janitor's staff in a building of 300 numbered rooms includes about 20 persons. A dozen of them are scrubwomen who go to work at 6 in the morning, quit at 9 and begin again at about 5 p. m., continuing till the work is done. There are eight or ten men who polish brass and do the heavier work of various sorts, including small repairs, and the night watchmen. The engineer has his own staff of 10 or 12, including firemen and elevator men.

Besides being to all intents and purposes an employer the janitor is a purchaser of no small account. Brooms, dusting brushes, boxes of soap, polishing powder and soapine, rubbing cloths, glass, putty, etc., are bought in wholesale lots every six months, and the yearly outlay for supplies, wages, etc., in such a building reaches well up into the sums that are expressed by four figures. For all these expenditures and for the conduct of his employees the janitor is responsible, and he has to keep a very level head all the time, for he has as many masters as there are tenants besides the agent and the owner. "Some folks think janitors have a

'snap,' " said one of the ablest janitors I know, a man who has charge of a famous building in one of our large cities, "but they don't. Times ain't what they used to be. When I went into the business, office janitors got no salaries. They had their rent free, as they do now, and they looked after the scrubwomen, as they do now, but they didn't take care of the tenants' rooms unless the tenants hired them to. Most tenants did this, and besides they paid the janitors to keep their towels washed and furnish soap and the like of that. Why, in them days I was in hard luck if I couldn't get \$200 to \$250 a month net out of the job, and one year it run \$300. Some of the janitors used to make \$400 or \$500 a month. Them was the days for money.

"But bimely some fellow that put up a big building had a new scheme. He offered to keep the rooms clean and in good order for his tenants without any extra pay beyond the rent. He thought he could fill his building easier and quicker that way. And, say, the scheme worked, and now all the big buildings are run so all we janitors are on salary, and the real good times have gone. Oh, yes, it's better fort he tenants and better for the landlords, but where do we come in, I'd like to know?

"To be sure, some of us have a few little things left, like getting ice for the tenants and moving them from one floor

A JANITOR'S SUBORDINATES,

to another, and so on, but the hull busi-ness don't amount to much. The towel supply companies have spoiled our towel and soap business; we can't make anything on supplies for the buildings, for, though we buy, we turn the bills over to the agents-they're a new feature, too, and they attend to the renting nowadays-and we have to look a good deal sharper after the tenants' comfort

Of course it is an object to the janitor

than we used to."

to get his living apartments rent free in addition to his wages. Sometimes these apartments are large and handsome. Occasionally they consist of a house of several airy rooms built upon the main roof, which serves as a yard, albeit it may not be converted into a sodded lawn. In the summer time this roof yard is the most delightful place in the world for a promenade or for quiet lounging. In the winter time it is a bit airy perhaps, but not so disagreeably cold and bleak as might be expected. It is a capital play space for children at all seasons if well protected by railings. When there is snow, it does not melt as quickly as on the street level, and a certain small boy who has lived on one of these roofs all his life can tell a great number of interesting yarns about the snow forts he has built and the snowmen he has "sculpted" 150 feet above the street level. The same boy pitches a tent on the roof in the summer time, and the entire family enjoy its shade. The apartments on this roof are furnished with taste, there is a plane of good tone in the "parlor," and etchings and engravings hang on the walls.

It should not be imagined that all janitors are of the same social grade. No, indeed. Janitordom assuredly has its aristocracy. Between the \$75 a month janitor of the old fashioned five and six storied buildings and the \$200 a month janitor who has charge of eight or ten stories there is as great a gulf as between the high grade janitor and the superintendent who is able to associate with professional men and small merchants. Upper crust janitors are treated with great respect when in the company of others of the same calling. Of course there are thousands of resi-

dent and nonresident janitors in every really great city who care for business blocks, flat houses and the like; but, saving only those who have charge of the biggest apartment buildings, none is to be mentioned in the same breath as to social standing with the resident janitor of office buildings. And don't be imposed upon by buying a remedy that requires you to do so, as it is nothing more than a substitute. In the sudden stoppage of the use of tobacco you must have some stimulant, and in most all cases, the effect of the stimulant, be it opium, morphine, or other opiates, leaves a far worse habit contracted. Ask your druggist about "BACO-CURO." It is purely vegetable. You do not have to stop using tobacco with "BACO-CURO." It will notity you when to stop and your desire for tobacco will cease. that the horizible craving for tobacco has left that the horrible craving for tobacco has left me and I consider myself cured. I can fully recommend 'Baco-Curo'' to any person wishing to break themselves of the tobacco habit. Yours very truly.

Gentlemen—Last summer I furnished Mr

James Reid. of the town of Burnside, Trempea-leau Co., with three boxes of your "Baco-Curo."

He had chewed tobacco for over forty years

He had chewed tobacco for over forty years and the last year used over sixty-five pounds. He commenced using 'Baco-Curo' and one box did not have the effect, when he had used about one-half of the second box, he began to love his taste for tobacco, and when he had used one-half of the third box he had lost all his appetite for it, and is now entirely cured.

Yours truly, J. C. TAYLOR, Druggist TO WHOM IT MAY CONCERN.

This is to certify that I, William S Sawyer of Atlantic, County of Cass, State of Iowa, having been an invoterate smoker of tobacco bought three boxes of "Baco-Curo" Dec. 21, 1894. Began taking same according to directions and can say that I am completely cured of the tobacco habit "Baco-Curo" is simply wonderful and I recommend it to all who are slaves to the tobacco habit and wish to be cured I am in perfect health and have not felt so well in years. That terrible craving, which every tobacco user has more or less, has completely disappeared and I feel like a new man. Clayton, Nevada Co., Ark., Jan. 28, 195, Eureka Chemical & Mig. Co., La Crosse, Wis. Eureka Chemical & Mig. Co., La Crosse, Wis. Gentlemen—For forty years I used tobacco in all its forms. For twenty-nve years of that time I was a great sufferer from general debility and heart disease. For fifteen years I tried to quit, but couldn't. I took various remedies, among others "No-To-Bac," "The Indiar To-bacco Antidote." "Pouble Chloride of Gold," etc., etc., but none of them did me the least bit of good Finally, however I purchased a box of your "Baco-Curo" and it has entirely cured me of the habit in all its forms, and I have increased thirty pounds in weight and am reoreased thirty pounds in weight and am re-lieved from all the numerous aches and pains of body and mind. I could write a quire of pa-per upon my chained feelings and condition. Yours respectfully, P. H. MARBGRY, Fastor C. P. Church, Clayton, Ark.

WHAT MR. KRAEMER SAYS OF "BACO-CURO."

ATLANTIC, Iowa, Feb. 4, 1895.

About eight weeks ago I bought three boxes of "Baco-Curo" I began taking it according to directions, and after taking one and one-half boxes, all the desire for eigarettes left me, and I have had no desire since.

I can heartily recommend "Baco-Curo" to all who are slaves to the eigarette habit or tobacco habit in any form, and are in search of a cure. I had become so under the influence of eigarettes, I could not remember anything, could not study, unless under the influence of the drug, which is death in the end, if kept up.

Cigarettes are sapping the Livis out of more boys and young men to-day, than anything that is known to the world. Boys, before it is too late get some of this remedy that killed the craving for cigarettes in me and save your young life. Restore yourself to manhood. You will feel as though you had escaped an awful doom and you have, when cured by "Baco-Curo," for you feel like a new being. I never felt better in all my life than at this present writing. I did not know that was the matter with use, until informed by the agent. He told me what was the ceason book not do anything unless under the influence of the death-dealing poison found in characters. I do not believe him at first, until he explained the action of the system.

The propose in goods and thank God and all experience I am a sound person to-day. Hoping the may not reached the uncorrected and sound person to-day. Hoping the may reached the uncorrected and sound person to-day. Hoping

'Captain H—, it seems to me I've read or heard of your being struck?'
"Yes, she was," answered the old yarn

spinner. "Where was it?"

"Off Point Aux Barques, about 15 years Very strange case that. Probably the only one of the kind ever heard of."

"Give us the particulars." "Well, we were jogging along down when a thunderstorm overtook us, and the very first flash of lightning struck the deck amidships and bored a hole as big as my leg right down through the bottom. ' And she foundered, of course."

"No. sir The water began rushing in, and she would have foundered, but there came a second flash, and a bolt struck my fore topgallant mast. It was ent off near the top, turned bottom end up, and as it came down it entered the hole and plugged it up as tight as a drum. When we got down to dry dock, we simply sawed off either end and left the plug in the planks. -Texas ziftings.

A Large Audience Present at the Pres byterian Church, Last Night-Addresses by Bishop Andrews, Br. Bradford

and Dr Tyler-Fine Music. From Our Goshen Correspondent

The unusually complete and satislactory character of the three services given in the Presbyterian Church, Sunday, commemorative of the 175th anniversary of the crganization of the church, resulted in the attendance of another large corgregation at the services, last night Long before the hour set for opening the services arrived, the people began to arrive and by the time the organ pealed forth the prelude announcing the commencement of the exercises every seat in the large edifice was filled.

The first number on the musical programme was a selection by the Schumann Male Quar ette, of New York, consisting of S. Fischer Miller and Addison F. Andrews, tenor; Grant Odel', baritone, and John D Shaw, bass. As these are all well known musical artists, whose performances in Goshen and other places in the county have on many previous occasions pleased large audiences, it is scarcely necessary to state that their several selections rendered last night were of a most erjoyable nature.

After this selection the large chorus, augmented by the choir of the Congregational Church, of Middletown sang a hymn, which was followed by a prayer by W. A Robinsor D. D. of Middletown. The Schumann Quartette then sang another pleasing selection, followed by the reading of the 2d Pealm by Rev. D. E. Bonner, D. D., of Florida. A quintette from "Moses in Egypt" was then creditably rendered by Miss Hilke, Mrs. Sweezy and the Schumann Quartette.

Rev. Mr. Clark then introduced Bishop Andrews, of the M. E Church of New York. He gave an able, instructive and interesting ad dress, recounting many reminis-cences connected with the history of christianity in America. In con-cluding he said: "And may it please God to give this church another 175 years of christian prosperity."

At the conclusion of Bishop Andrews' address Miss Katherine Hilke and the Schumann Quartette sang Gounod's "Aava Maria." As a soprano Miss Hilke is one of the most emphatic successes who has ever sang in Goshen and last night her singing certainly deepened and emphasized the good impressions previously produced.

Rev. A. H. Bradford, D. D of New York, was the next speaker introduced by Rev. Mr. Clark. His remarks covered a large field. He spoke of christianity as it exists in every quarter of the globe a d enforced upon his hearers the necessity of brotherhood in the different christian denominations. He spoke for forty minutes and every word was of the most interesting nature.

Mr. S. Fischer Miller next sang a tenor air, "The Holy Cicy." It was admirably rendered and was without doubt the gem of the musical part of the services.

After the chorus had sung hymn 941, Mr. Clark introduced Rev. B. B. Tyler, D. D, of the Disciples of Ohrist, of New York. His address was able, eloquent and humorous. and notwithstanding the lateness of the hour his remarks were listened to with the profundest interest.

The last number on the musical programme was a chorus from Mcses in Egypt, "We drive them from the city," the bass solo part being taken by Mr. George N. Wiseman, of New York, who, as is well known, is one of the greatest baseos who has ever sung to a Goshen audience. He will sing again at the services on Thursday evening. This chorus was rendered in a most complete, wellbalanced and satisfactory manner.

The evening exercises concluded at 10 o'clock with the benediction by Bishop Andrews

At the services, to-night, Rev. Edward Judson, D. D., of the Baptist Church, and Rev. D. J. Burrell, D. D., of the Reformed Church, will be the speakers. The following is the musical programme:

PORT JERVIS'S FIRE BJC.

The Village Terrorized-Three Fires Saturday Night-Fowler Hose House and Contents Destroyed this Morning The village of Port Jervis is in a state of terror on account of the d predations of fire bugs. The people go to bed at night with almost an expectation of being roused from their sleep by an alarm of fire, uncertain as to whether they may not themselves be the sufferers from the incendiary's torch. In addition to the numerous fires which have recently occurred in that village, the fire fiend started no less than three conflagrations on Saturday night.

These fires were extingushed by the firemen without great damage and this it would seem did not please the fire-bug and he decided to get eveby burning a fire house and appara tus and selected Fowler Hose house as the one that would be likely to cripple the department the most.

To make sure work of it the doors and windows were securely nailed from the inside, and after getting the fire nicely under way the incendiary left the building by a rear window.

The fire was discovered at 3 clock, this morning, and at that time the building was a mass of flames. The firemen turned out but could do,no good except to protect adjoining property. The building, hose carriage and hose were destroyed.
